

# Video-scope

Video-frenzel system

## DESCRIPTION

Video-Scope is the line of Video-Frenzel systems, dedicated to the observation of ocular movements, whether nystagmus is spontaneous or induced by stimulation.

Video-Scope is available in two versions: wired and wireless. Users looking for a wireless solution can also choose between two models of goggles: Goggles Flex (more flexible and adaptable to any face shape) or Xpress mask (more reliable for intensive use and easier to clean).

## VIDEO-SCOPE FEATURES

- Video recording of eye image with or without environmental image
- Display of single or both eyes on secondary screen
- Video replay
- Possibility of upgrading to VNG

## COMPATIBLE DEVICES

- Wireless camera with Goggles Flex
- Wireless camera with Xpress mask
- Wired VNS4X camera with Goggles Flex
- Wired VNS3X camera with Goggles Flex

## REQUIRED SOFTWARE

Video-scope software is installed as module in Maestro software: possibility to manage patients' data in a unique database, store and print exam reports.

## INTERFACE WITH EQUIPMENT

USB connection with wired VNS4X camera

Wi-Fi connection with wireless camera

## PC MINIMUM REQUIREMENTS
